ABOUT ME

Fresher Python Developer with hands-on experience in building backend applications using **Python, Django, and PostgreSQL**. Experienced with **RESTful API development, containerization using Docker, and version control with Git**. Completed freelance outsourcing work for Draco company, contributing to backend features and system improvements. Passionate about backend engineering, scalable system design, and writing clean, maintainable code.

WORK EXPERIENCE

Fiverr Platform – Ho Chi Minh city, Vietnam

Freelance Python Developer

[01/01/2024 – Current]

- Developed backend features using Python and Django for multiple client projects
- Built RESTful APIs and integrated external APIs based on client requirements
- Designed PostgreSQL database schemas and optimized SQL queries
- Delivered production-ready code and documentation within tight deadlines
- Maintained source control using Git and GitHub

Draco Company – Ho Chi Minh city, Vietnam

Python Backend Developer

[10/10/2025 – 11/01/2026]

- Developed backend modules using Python and Django for internal service systems
- Collaborated with developers through Git/GitHub workflow (branching, pull requests, code reviews).
- Deployed development environments using Docker containers on Linux systems.
- Fixed backend bugs and improved application stability during development cycles.

TEAM PROJECT – Ho Chi Minh city, Vietnam

AI Career Advisor – Intelligent Career Guidance Platform

[10/10/2025 – 22/01/2026]

GitHub: https://github.com/quocbao2004/ai_career_advisor

Team size: 2

Role: Backend Developer (AI Features)

- Designed and implemented AI-powered backend features using Python and Django.
- Integrated Gemini API to generate intelligent career recommendations for users.
- Developed AI chatbot service to assist users with career-related questions.
- Implemented AI-driven career recommendation system based on user assessments and profile data.
- Built personalized learning roadmap generation using AI to guide users in developing required skills.
- Designed and managed PostgreSQL database schema for storing user profiles and career recommendation data.
- Integrated backend APIs with the frontend application.

Technologies:

- Python, Django, Gemini API, RAG, PostgreSQL, Vector Database

EDUCATION AND TRAINING

INFORMATION TECHNOLOGY

SaiGon University of Technology [10/2022 – 10/2026]

City: Ho Chi Minh | Country: Vietnam | Field(s) of study: Backend Developer | Final grade: GPA 7.29/10

SKILLS

Backend

JSON / PostgreSQL / Django / Python / Django Authentication / RESTful APIs / Research & Development

Database

SQL / PostgreSQL

Version Control

Git Flow / Github / Docker / Git

HOBBIES AND INTERESTS

Research

- Reading Tech Blogs / Learning New Technologies
- Coding and exploring new technologies
